

City Engineer

The City of Starkville

The City Engineer is responsible for managing the Engineering and Streets Departments; planning, coordinating, and supervising the design, construction, and inspection of all capital improvement projects; and any other public improvements that relate to streets, utilities, or other types of public infrastructure. The City Engineer must be knowledgeable and operate in accordance with laws, codes, policies, and regulations set forth by the Department, the City, and the State of Mississippi.

Successful candidates will hold a bachelor's degree in Civil Engineering and have a minimum of five years related experience, preferably in the public sector. The candidate will also be a registered Professional Engineer or will be required to obtain registration within six months of employment.

The salary for this position is competitive based upon experience and qualifications. The position will remain open until a qualified candidate is selected.

The City of Starkville is an equal opportunity employer.
